

Date

L.O: to describe how a baby develops from conception through the nine months of pregnancy, to birth.

## Recap

**What changes do girls go through during puberty?**

**What changes do boys go through during puberty?**

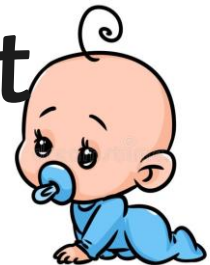

# SRE Ground Rules.

Today, we're going to talk about 'reproduction' and how a baby is made.

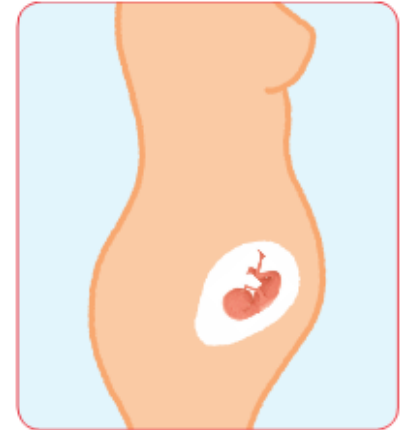

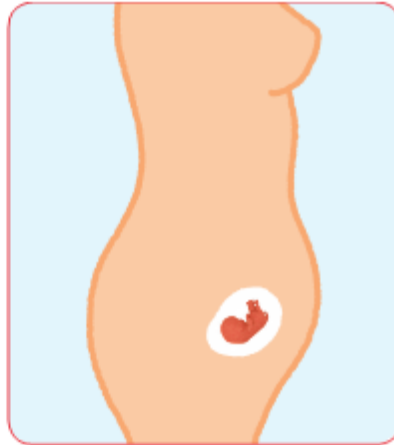

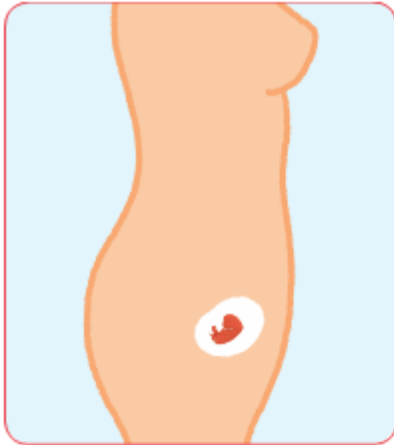

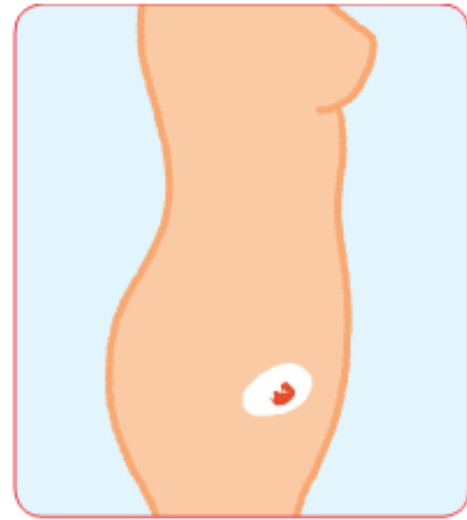

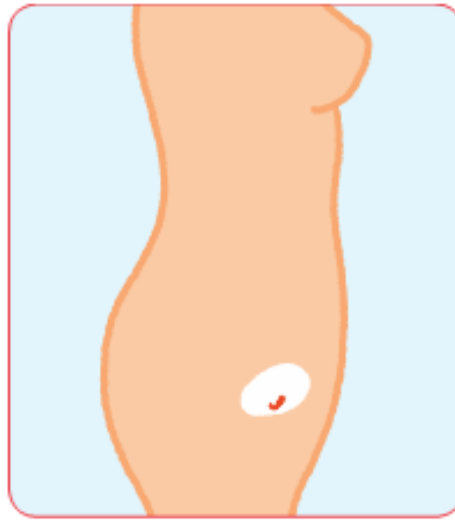

It's perfectly natural to find this awkward or embarrassing, so don't worry!

So, what do you know about how a baby is made?

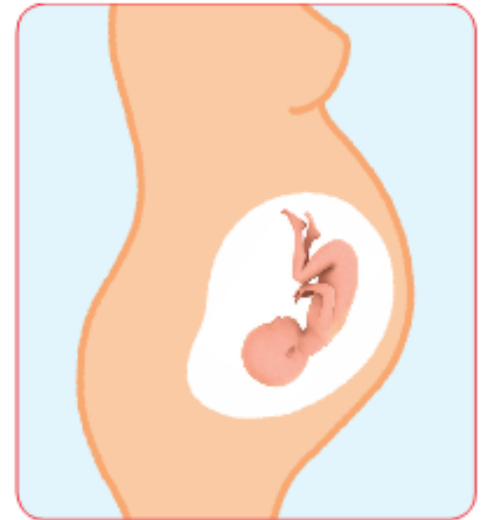

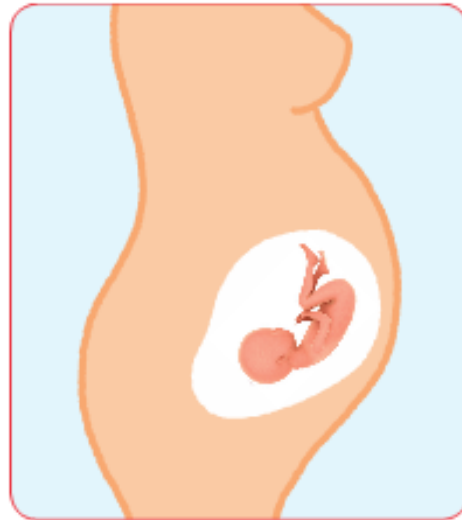

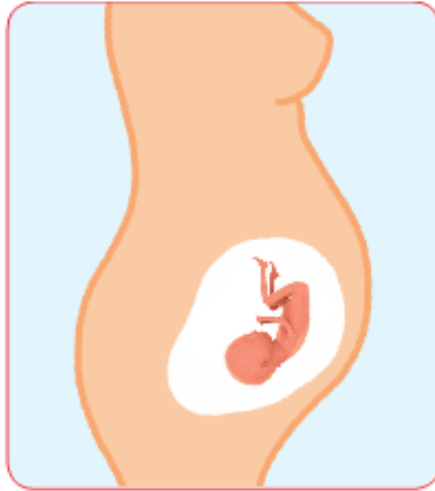

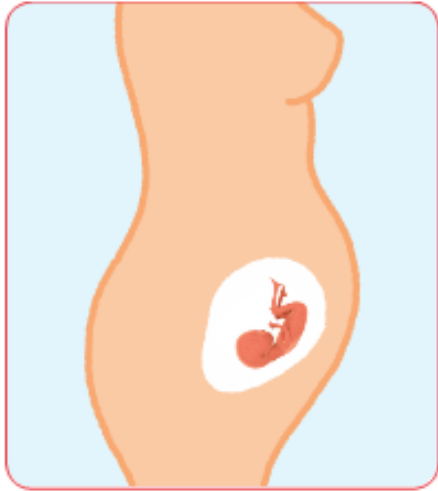

# Babies in the womb

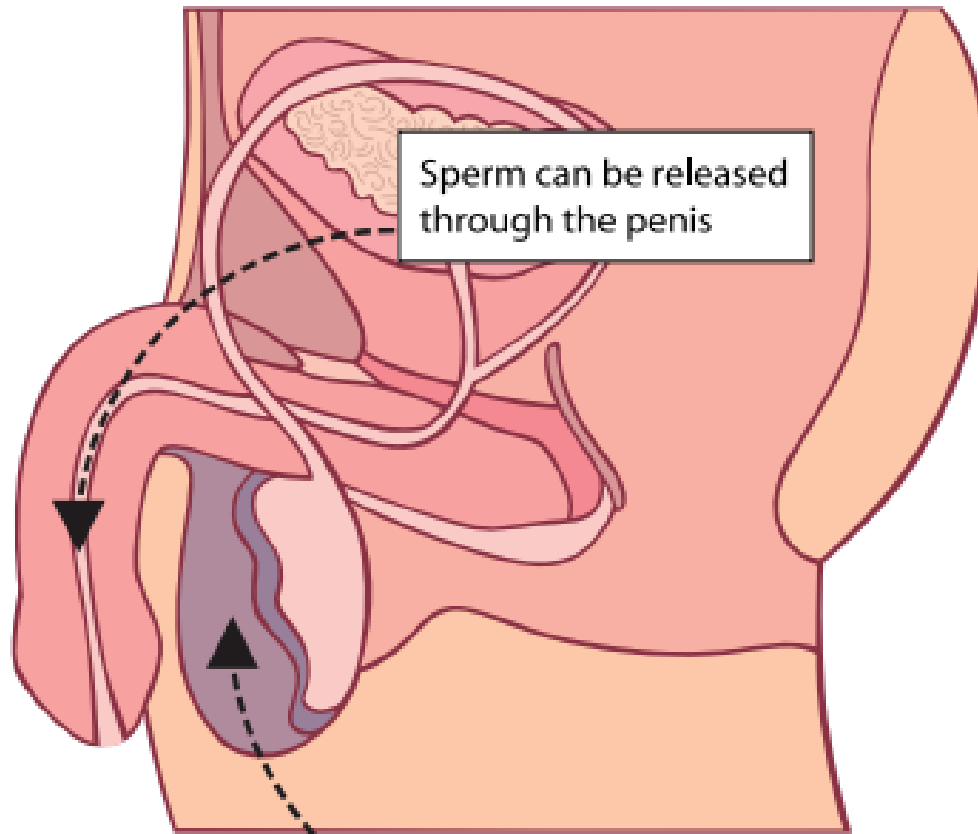

What is the earliest memory you have? What point can't we remember?

# Babies in the womb

# The Male Reproductive System

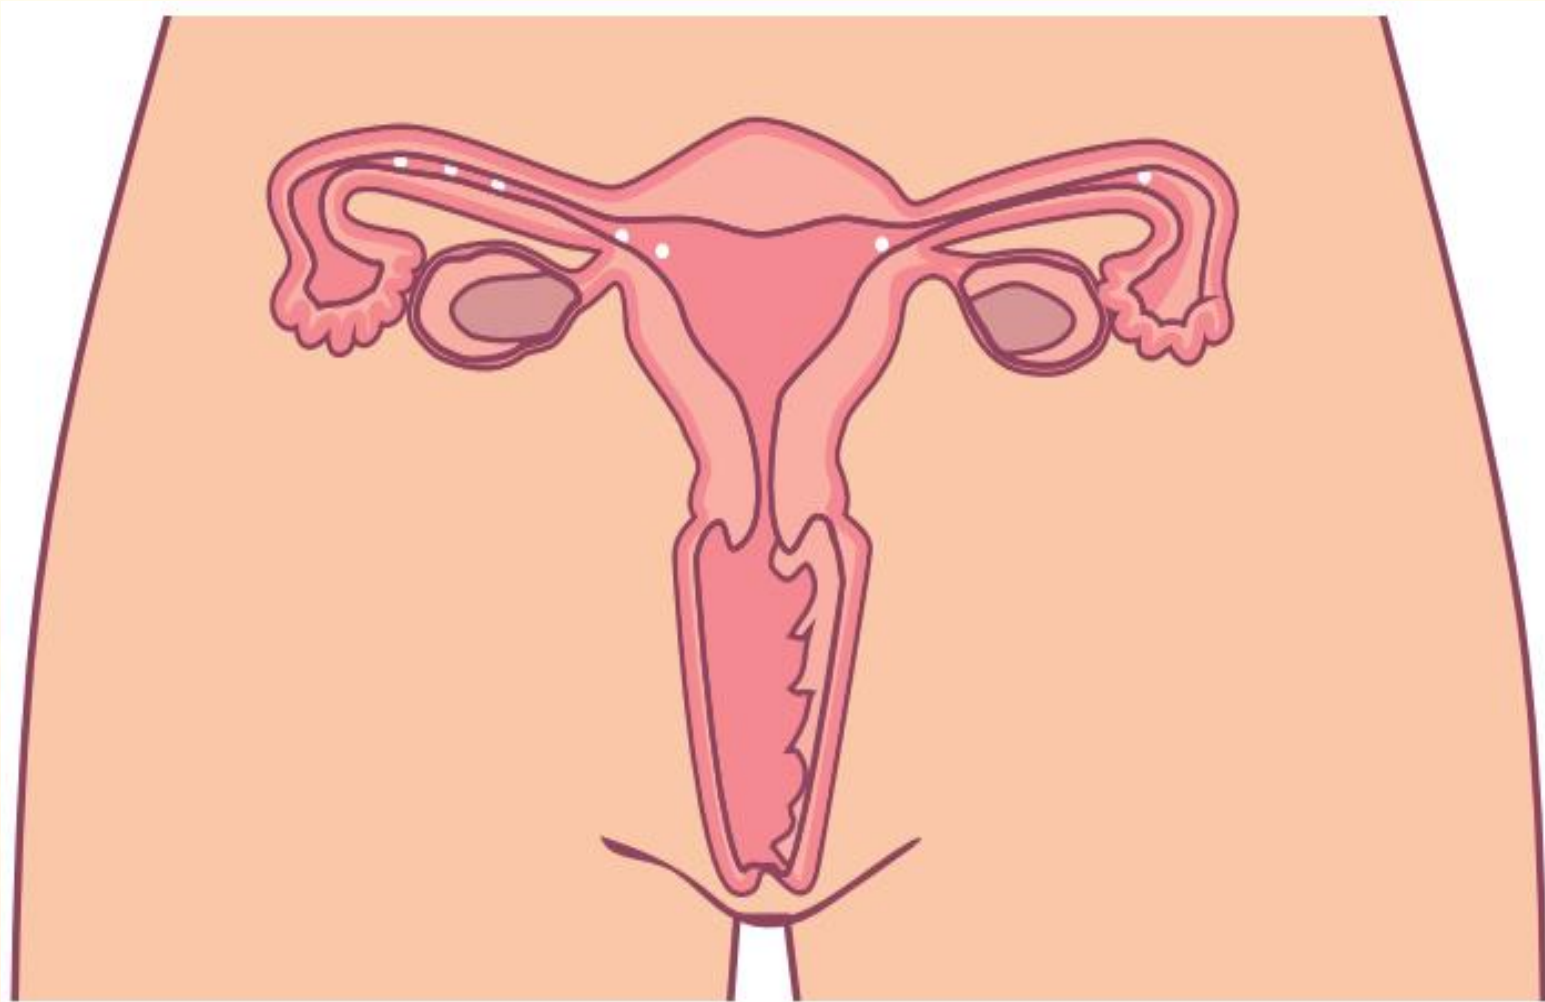

Sperm can be released through the penis

The testicles grow and start to make sperm which are tiny seeds that are needed to start a baby growing

# The Female Reproductive System

# Questions? Questions?
